Junior Cybersecurity Analyst & Full Stack Developer

PROFILE

Computer Science student and Full Stack Developer with a strong foundation in algorithms, systems, and databases. I leverage deep knowledge of web architecture (Next.js/Node.js) to identify vulnerabilities in application logic. Passionate about Application Security and Network Defense.

PROFESSIONAL EXPERIENCE

Web Development Intern | Intellisec Solutions (Canada) *August 2025 – Present*

- **Secure Component Development:** Developed responsive and modular web components using **React.js** and **Next.js**, ensuring clean code architecture.
- **Code Review & Optimization:** Collaborated with the development team to debug application logic and optimize frontend performance, gaining insight into secure software development lifecycles (SDLC).
- **Technical Workflow Management:** Managed development sprints and tracked technical milestones using project management tools, ensuring efficient delivery of software features.

PROJECTS

1. **Secure Task Management System (Full Stack)** *Technologies: Node.js, Express, React, MongoDB*
 - **Authentication & Cryptography:** Implemented secure user authentication using **Bcrypt** for password hashing and **HttpOnly Cookies** for session management to mitigate XSS risks.
 - **Secure API Design:** Developed RESTful endpoints with input validation to ensure data integrity and prevent common injection vulnerabilities.
 - **Role-Based Logic:** Engineered the backend to handle user permissions, ensuring users can only access and modify their own task data.
2. **Linux System Management & Automation** *Technologies: Bash Scripting, Ubuntu Linux*

- **Automated Security Tasks:** Wrote shell scripts to automate file backups and monitor system logs, ensuring data availability and integrity.
 - **Access Control:** Implemented user permission management scripts to enforce least-privilege principles on Linux environments
3. **Relational Database Architecture** *Technologies: SQL, MySQL*
- **Data Integrity:** Designed a normalized database schema for a mock e-commerce platform, ensuring strict data typing and relational integrity.
 - **Query Optimization:** Wrote complex SQL queries for data reporting, demonstrating a strong understanding of database structures often targeted by SQL Injection attacks.
4. **Personal Web Portfolio (Live Demo: <https://youssef-portfolio-disxd4akk-youssef-elrhomaris-projects.vercel.app/>)** *Technologies: Next.js, Tailwind CSS*
- **Secure Deployment:** Deployed a high-performance web platform focusing on secure configuration and server-side rendering architecture.
-

SKILLS

- **Programming Languages:** **Python** (Scripting/Automation), **Java, C & C++** (Memory Management), **Assembly** (Reverse Engineering), **SQL, JavaScript, Bash.**
 - **Web Technologies:** **Node.js, Next.js, React.js**, **HTML/CSS**, **Express**, **MongoDB.**
 - **Security & Systems:** **Linux Administration** (Kali, Ubuntu), **Secure Session Management** (Cookies/Bcrypt), **Network Fundamentals**, **Git/GitHub.**
-

EDUCATION

Bachelor in Computer Science: Cybersecurity, Systems & Networks *University Cadi Ayyad*

– Faculty of Science Semlalia, Marrakesh Sep 2023 – Present (Currently in 3rd Year)

- **Academic Standing:** Maintaining high academic performance (GPA: 3.5/4.0 in previous years).
- **Specialization:** Advanced coursework in **Network Security**, **System Administration (Linux)**, and **Vulnerability Assessment.**
- **Foundation:** Completed 2 years of Applied Computer Science focusing on Algorithms, C++, and Web Architecture.

Relevant Courses:

- **Programming in C & C++**
- **Web Development (front end) with Next.js and React.js.**
- **Operating Systems (Linux)**
- **Relational Databases (SQL-MCD-MLD)**
- **Algorithms and Data Structures**
- **Computer Architecture**

- Networks

CERTIFICATIONS & SOFT SKILLS

- Emotional Intelligence Training – 2025
 - Team collaboration, time management, problem solving, critical thinking
-

Languages:

French (Intermediate), English (Intermediate), Arabic (Native)

EXTRACURRICULAR

- Member of the IT Club at FSSM
- Volunteered in university tech events
